

## Organic Rosé

75cl

Kendermanns

Kendermanns is the dynamic German wine brand that provides high quality, contemporary wine styles and meets the individual needs of today's consumers by offering a wide range of outstanding value wines. Organic products have now become mainstream as the interest in the environment increases. Kendermanns Organic Rosé is a wine to enjoy because, first and foremost, it tastes good - and also because it has the added advantage that it is produced from organically grown grapes. The grapes came from Rheinhessen, where there is particular interest in natural methods of viticulture. The environmentally friendly methods used to make Kendermanns Organic Rosé are of great benefit to the countryside, especially in artificial monocultures such as vineyards. Only natural fertilisers are used and leguminous plants with a deep root structure are planted inbetween the vines. This means that nitrogen is increased allowing good growth of the vine and that soil erosion is also reduced. Synthetic fertilisers, pesticides and herbicides are not allowed. Pheromone traps and natural predators are used to control the populations of species harmful to the vines and the grapes.

### Country of Origin / Region

Germany, Rheinhessen
