

## Sauvignon Blanc Kalkstein

75cl

Weinhaus Reh Kendermann

The cool and dry climate in combination with the deep and nutrient-rich limestone soil offers ideal growing conditions for the Sauvignon Blanc grape. The vines can root deeply and hence they are more water stress – resistant. This grape variety which came from France over New Zealand to Germany develops great aromas on these thin porous limestone soil. Therefore, the wine is very aromatic and has exotic notes of mango, passionfruit and citrus fruit. A delicious refreshing wine with well-balanced acidity.

### Country of Origin / Region

Germany, Pfalz

### Grape variety
